

PROJECT PROFILE

Project: FY 13/14 Manhole Rehabilitation & Replacement Project

Location: Long Beach, CA

Owner: Long Beach Water Department

Engineer: Long Beach Water Department / Engineering

Applicator: Ayala Engineering, Anaheim, CA

Sauereisen Representative:

Mike Keating, J.A.CRAWFORD CO.

Products:

- No. 210X – SewerGard High Strength

Method of Application:

- Graco Xtreme 60 Spray Pump

Environment / Exposure:

- Municipal Wastewater

Project Details:

- Project includes the rehabilitation of 23 existing brick sewer manholes with cementitious underlayment and SewerGard No. 210X at 125 mils. The manholes were rehabilitated while in service.
- Previous city specifications called out rehabilitation and coating with polyurethane lining. Continuous failures of polyurethane linings lead to conversion to SewerGard No. 210 epoxy lining.
