

OBIC Flush – OBIC

Typical Use

OBIC Flush is ideal for use in cleaning plural component systems without the threat of damage to pump O-rings and gaskets. Because it is non-reactive with isocyanates, OBIC Flush is also an excellent material for flushing polyurethane foam and rim processing equipment.

Product Highlights

OBIC Flush is used to flush urethane and polyurea application equipment. OBIC Flush is soluble in all organic solvents, but not water miscible. Product highlights include:

- Very good plasticizer
- Phthalate-free
- Non-reactive with isocyanates
- The best long-term storage fluid available
- Produced in an ISO 9001-2015 certified facility

Safety

Read and review entire SDS for OBIC Flush prior to use.

Packaging, Storage & Shelf Life

OBIC Flush is available in 5-gallon pails and 55-gallon drums. It should be stored in sealed containers between 68°F and 80°F. Shelf life is 2 years under normal conditions.
