RE: Town of Bernice
Sewer Rehabilitation Project
LCDBG Project No. 2000220783
Sewer Sentry Performance

Dear Sir:

Earlier this year, JABAR Corporation installed 100 Sewer Sentries on manholes in Bernice, Louisiana in the Church Street Lift Station flow basin. Based on my observations and my conversations with the Town's operator, Bernice has seen tremendous reduction in inflow because of these devices. While the exact volume of inflow prevented from entering the sewer system is hard to quantify, the Town has seen reductions in both sewer system overflows and reductions in lift station pump run times since the Sewer Sentries were installed. For these reasons, we believe the Sewer Sentries were a good investment for the Town of Bernice. The Town hopes to continue to install additional Sewer Sentries in other areas of their system.

Please call me if you have any questions. Thank you.

Sincerely,

RILEY COMPANY OF LOUISIANA, INC.
