

How Pro-Pipe Restored the Nogales IOI Sewer Line

Pro-Pipe's Success in Restoring the Nogales IOI Sewer Line

Maintaining critical infrastructure demands expertise and innovation, especially for large-scale sewer systems. The **Nogales International Outfall Interceptor (IOI)**, an eight-mile pipeline from **Nogales, Sonora, to Rio Rico, Arizona**, faced severe blockages from stormwater inflows and heavy debris, threatening its efficiency and safety. **Pro-Pipe** successfully executed a time-sensitive cleaning operation using **advanced water-recycling equipment and expert coordination**, restoring the pipeline's functionality while minimizing environmental impact. **Read the full case study** to see how Pro-Pipe tackled this complex challenge with precision and efficiency.
