

Introducing Our Next-Generation Structural Fast-Curing Polyurea Resin!

We are excited to unveil our latest innovation in pipelining technology: PipeCast Rigid, a structural-grade polyurea resin engineered for rapid curing and superior durability. Designed to meet the highest industry standards, this advanced formulation delivers exceptional adhesion, chemical resistance, and structural integrity, making it the ideal choice for demanding rehabilitation projects.

ipp
Solutions, LLC

Key Features:

Fast Cure Time – Achieves full structural strength in record time, reducing downtime and increasing efficiency.

Superior Bonding – Exceptional adhesion to a variety of substrates, ensuring a reliable and long-lasting solution.

Chemical & Abrasion Resistance – Designed to withstand aggressive environmental conditions, ensuring extended service life.

Versatile Applications – Ideal for SIPP lining, protective coatings, and structural reinforcement in municipal and industrial projects.

Meets Industry Standards – Developed in accordance with ASTM F1216 to guarantee quality and reliability.

With PipeCast Rigid, professionals can accelerate project timelines without compromising durability or performance. Whether reinforcing aging pipelines or applying high-performance protective coatings, this cutting-edge polyurea resin sets a new benchmark in efficiency, resilience, and long-term value.
